You saved us 90% on our furnace repair . . .

The original electric furnace installed in our Palm Desert condo 30 years ago stopped working and several companies came out to quote on a replacement unit.

The problem is that a new A/C unit installed 10 months earlier does not have a heat pump ... and that means we would have to replace both the new A/C and the old furnace.

Price quotes were all about \$6,000.

You sent Grant to us on a service call. He determined the heating coils in the furnace still work and the problem centered on a worn out switch which he was able to replace on the spot.

\$670 instead of \$6,000 - a dramatic savings to be sure but more important ... evidence of fair and honest dealing - a company and employees with integrity. You can't put a price on that!
